

To whom it may concern,

First of all, we indicate that we could not understand that the fact, the unlawful claims made against our company are published by you without the answer of our company. Does this publication without our answer comply with basic principles of human rights?

As Vega Wind Energy Electricity Generation Inc., our company continues electricity generation activities from wind energy plant in Turkey, Izmir province, Cesme township for about 5 years since May 2015 with production license received in accordance with the law.

THE WIND FARM PROJECT AREA IS A ZONE WITHOUT CONSTRUCTION PERMIT FOR ANY HOUSES OR HOTELS . AREA IS A NON RESIDANTIAL ZONE.

Closest house which is constructed with a construction permit is 703 meter far away. All activities of our company are carried out in accordance with human rights and in this context, in order to create a cleaner, healthier and “sustainable” life, in particular in the protection of the environment. Therefore we can not accept any breach of our wind power plant activities by not being consulted with the society, violating land rights, harassment and allegations that the construction continues despite the court's decision to stop the project.

As a matter of fact, the Environmental Impact Assessment Report required for our company to continue its activities is in compliance with the law and the lawsuit filed against this report has been concluded in favor of our company. On the other hand, the zoning plans for the areas in which we conduct our activities are in accordance with the law. All these issues show that our company's activities meet humanistic and environmental requirements to the finest detail and generate electricity from wind energy in accordance with the public interest. In addition, we report that “electromagnetic resonance” and “noise measurements” that we believe your center will not normally find in any wind power plant, are meticulously reported by our company for human health at all times. If you wish, we can share the reports including the results that are completely suitable for human health.

**On the other hand; in fact, the claims, are brought to the agenda in order to open the way for the construction of the buildings in the area including the area where our company conducts its activities, unacceptable in line with the foregoing. IN THIS UNDERSTANDING, WE FEEL CONFUSED IN YOUR NAME ON YOUR CENTER USED TO CONCRETE NATURE.** In this context, we provide our answers by stating that we reserve our legal rights against all declarations and publications that are wrongly and unlawfully asserted about our company and disparage our companies activities.
